

ALEX FATOGUN

Junior QA Engineer | Manual Testing & Playwright Automation

London, United Kingdom | 07867 855730 | alex.fatogun@yahoo.com | [GitHub: github.com/alex3381](https://github.com/alex3381)

PROFESSIONAL PROFILE

Junior QA Engineer / Software Tester with hands-on experience from end-to-end portfolio projects in manual testing, Jira and Playwright with JavaScript. Comfortable taking a requirement or acceptance criterion, turning it into traceable tests, recording evidence, investigating defects and deciding what needs retesting or regression coverage. My earlier software-development and reporting roles add practical experience with REST APIs, HTTP, Postman, SQL, debugging and data validation. Currently preparing for ISTQB CTFL.

CORE QA & TECHNICAL SKILLS

Manual testing: Functional, regression, smoke, exploratory, positive/negative, boundary-value, state-transition, cross-browser and responsive testing.

Test analysis & documentation: Requirements analysis, user stories, acceptance criteria, test plans, scenarios, test cases, test data, expected vs actual results, RTM, defect reports, evidence capture and test summary reporting.

Automation: Playwright Test with JavaScript, locators, assertions, auto-waiting, browser projects, HTML reports, screenshots, video and traces.

API & data: REST API integration and basic API verification with Postman; HTTP GET/POST, request/response handling, status codes, JSON, SQL and Excel.

Tools & workflow: Jira, Git, GitHub, GitHub Actions CI, VS Code, Node.js/npm, Chrome/Edge DevTools; SDLC, STLC, Agile/Scrum concepts, defect lifecycle, retesting and regression.

QA PROJECTS

End-to-End QA Engineering Project - Browser Game | Manual Testing | Jira | Playwright JavaScript | GitHub Actions CI | Aug 2026

GitHub: github.com/alex3381/bird-game-qa-portfolio

- Built a browser-based game in HTML, CSS and JavaScript and used it as a complete QA case study. Turned the agreed behaviour into 24 functional and 2 non-functional requirements, then mapped them to Jira User Stories, acceptance criteria and traceability.
- Designed and ran 41 manual tests covering functional, exploratory, regression, cross-browser and smaller-screen behaviour. The first cycle found 2 failures and 1 blocked test; after investigation and retesting, the manual cycle closed with no open Fail or Blocked results.
- When tests failed, logged and investigated defects in Jira with reproducible evidence and expected-versus-actual results. Verified the initial-state fix, used a controlled 20/20 Chromium repeat test for a non-reproducible observation, and kept the frame-rate issue visible as a known technical risk.
- Automated stable regression checks with Playwright and JavaScript: 24/24 Chromium tests plus 3/3 supported-browser compatibility checks passed locally (27/27 total). Added GitHub Actions CI and Playwright HTML reporting for repeatable regression runs.

TutorialsNinja eCommerce QA Portfolio | Manual Testing & Playwright | 2026

GitHub: github.com/alex3381/Manual_Testing_Register-Account-Testing-Project

- Created 28 manual tests for registration, validation, duplicate-account, UI and navigation behaviour, supported by test planning, scenarios, data, traceability, execution evidence and defect documentation; later automated registration and login checks with Playwright JavaScript using a Page Object Model structure and GitHub Actions CI.

EventHub Automation Portfolio | Playwright JavaScript | 2026

GitHub: github.com/alex3381/eventhub-playwright-automation-portfolio

- Automated three end-to-end scenarios covering event creation, customer booking, seat availability and refund eligibility, using unique test data, reusable helpers, assertions and Playwright reporting.

PROFESSIONAL EXPERIENCE

Work Coach | Department for Work and Pensions (DWP) | London | May 2025 - Dec 2025

- Managed a high volume of case records, checking supporting information for completeness, accuracy and consistency before taking or escalating action.
- Worked to structured procedures, kept clear evidence trails and handled sensitive information while explaining missing or conflicting requirements to customers and colleagues.
- Used case-management processes to track actions and follow-up work, escalating exceptions when information was incomplete or a decision needed further review.

Management Information Systems (MIS) | Airtel Telecoms | Sep 2019 - Dec 2022

- Produced and validated operational and performance reports using Excel and SQL, applying repeatable data-quality checks to identify incomplete, inconsistent or unusual records.
- Maintained management-information reports and dashboards and supported reporting automation, database maintenance, CRM, data-migration and system-integration work.
- Worked with operational stakeholders to investigate recurring reporting issues, reconcile discrepancies and improve the reliability of data used for decision-making.

Software Developer | Ecardex | Lagos, Nigeria | Jun 2017 - Aug 2019

- Developed Flutter mobile-application features, integrated REST APIs and validated application behaviour before release, including unit/integration testing, debugging and release checks.
- Used REST/HTTP request-response handling in application integrations and Postman to check API endpoints, payloads and responses during development and troubleshooting.
- Worked with PostgreSQL-backed data, investigated inconsistencies, documented technical changes and collaborated with colleagues to clarify requirements, edge cases and completed functionality.

Management Information and Operations | Airtel Telecoms | Lagos, Nigeria | Jul 2015 - May 2017

- Produced and reconciled operational reports, using repeatable validation steps to identify missing, inconsistent or unusual data and document corrective actions.
- Supported high-volume operational processes by keeping management-information records accurate and communicating recurring data or service issues to relevant stakeholders.

EDUCATION

MSc International Business with Data Analytics | Ulster University, Birmingham | Jan 2023 - Jan 2024

Distinction awarded March 2024.

BSc Physics | Federal University of Technology, Akure, Nigeria | Jun 2006 - Oct 2011

PROFESSIONAL DEVELOPMENT

- ISTQB Certified Tester Foundation Level (CTFL) - exam preparation in progress, 2026.
- Software Testing Training & Portfolio Development - independent structured learning in manual software testing, Playwright with JavaScript, browser developer tools and API testing, Jan 2026 - Present.
