

ALEX FATOGUN

Junior QA Engineer | Software Tester | Manual & Playwright Automation

United Kingdom | 07867 855730 | alex.fatogun@yahoo.com

Portfolio: <https://alex3381.github.io/alex-fatogun-qa-engineering-portfolio/> | GitHub: <https://github.com/alex3381>

PROFESSIONAL PROFILE

Junior QA Engineer / Software Tester with hands-on experience delivering end-to-end QA projects in manual testing, Jira and Playwright with JavaScript, supported by earlier professional experience in software development, data validation and operational reporting. Able to take a requirement or acceptance criterion through test design, execution, defect investigation, evidence capture, retesting and regression. Practical experience includes REST API testing with Postman and SoapUI, test case management with Jira and TestRail, SQL/PostgreSQL, Git/GitHub and GitHub Actions CI. Previous Flutter/Dart development work provides a strong understanding of application behavior, integration and debugging.

CORE QA & TECHNICAL SKILLS

- **Programming & Development:** JavaScript, Dart, Flutter
- **Automation:** Playwright Test, Page Object Model (POM), locators, assertions, auto-waiting, reusable helpers, browser projects, HTML reports, screenshots, video and traces
- **Manual Testing:** Functional, exploratory, regression, smoke, end-to-end, positive/negative, boundary-value, state-transition, UI, cross-browser and responsive testing
- **Test Analysis & Design:** Requirements analysis, user stories, acceptance criteria, test plans, test scenarios, test cases, test data, expected vs actual results, RTM, evidence capture and test summary reporting
- **API Testing:** Postman, SoapUI, REST APIs, HTTP GET/POST, request/response validation, status-code validation, JSON and payload validation
- **Test Management:** Jira, TestRail, defect reporting, test execution tracking, defect lifecycle, retesting and regression
- **CI/CD & Version Control:** GitHub Actions, Git, GitHub
- **Databases & Tools:** SQL, PostgreSQL, Excel, VS Code, Node.js/npm, Chrome and Edge DevTools
- **Methodologies:** SDLC, STLC, Agile/Scrum

QA PROJECTS

End-to-End STLC QA Engineering Project - Browser Game | Full Test Lifecycle | Jira | Playwright JavaScript | GitHub Actions CI | Aug 2026

Project evidence: <https://github.com/alex3381/bird-game-qa-portfolio>

- Built a browser-based game in HTML, CSS and JavaScript and used it as a complete QA case study; translated agreed behaviour into 24 functional and 2 non-functional requirements mapped to Jira user stories, acceptance criteria and traceability.
- Designed and executed 41 manual tests covering functional, exploratory, regression, cross-browser and smaller-screen behaviour. The first cycle identified 2 failures and 1 blocked test; after investigation and retesting, the cycle closed with no open Fail or Blocked results.
- Logged and investigated defects in Jira using reproducible evidence and expected-versus-actual results, then used controlled retesting to verify fixes and retain unresolved observations as documented technical risks.
- Automated stable regression checks with Playwright and JavaScript: 24/24 Chromium tests and 3/3 supported-browser compatibility checks passed locally. Added GitHub Actions CI and Playwright HTML reporting for repeatable regression runs.
- Produced the full STLC documentation set - Test Plan, test scenarios, detailed test cases, test data, Requirements Traceability Matrix (RTM), execution records, Jira defect records and Test Summary Report - maintaining traceability from requirements through execution and automation.
- Defined test environments, browser/smaller-screen coverage, entry and exit criteria, and QA risks; applied severity/priority, retesting, regression and residual-risk reporting to support evidence-based test completion decisions.

TutorialsNinja eCommerce QA Portfolio | Manual Testing & Playwright | 2026

Project evidence: https://github.com/alex3381/Manual_Testing_Register-Account-Testing-Project

- Created 28 manual tests covering registration, validation, duplicate-account, UI and navigation behaviour, supported by test planning, scenarios, test data, traceability, execution evidence and defect documentation; later automated registration and login checks with Playwright JavaScript using a Page Object Model and GitHub Actions CI.

EventHub Automation Portfolio | Playwright JavaScript | 2026

Project evidence: <https://github.com/alex3381/eventhub-playwright-automation-portfolio>

- Automated three end-to-end scenarios covering administrator event creation, customer booking, seat availability and refund eligibility using unique test data, reusable helpers, assertions and Playwright reporting.

PROFESSIONAL EXPERIENCE

Work Coach | Department for Work and Pensions (DWP) | London | May 2025 - Dec 2025

- Managed a high volume of case records, checking supporting information for completeness, accuracy and consistency before taking or escalating action.
- Worked to structured procedures, maintained clear evidence trails, and identified missing, incomplete or conflicting information while handling sensitive customer data.

Software Developer | Ecardex | Lagos, Nigeria | Sep 2019 - Dec 2022

- Developed Flutter mobile-application features using Dart, integrated REST APIs and validated application behaviour before release, including unit/integration testing, debugging and release checks.
- Used REST/HTTP request-response handling and Postman to check API endpoints, payloads and responses during development and troubleshooting.
- Worked with PostgreSQL-backed data, investigated inconsistencies, documented technical changes and collaborated with colleagues to clarify requirements, edge cases and completed functionality.

Management Information Systems (MIS) | Airtel Telecoms | Jun 2017 - Aug 2019

- Produced and validated operational and performance reports using Excel and SQL, applying repeatable data-quality checks to identify incomplete, inconsistent or unusual records.
- Maintained management-information reports and dashboards and supported reporting automation, database maintenance, CRM, data migration and system-integration work; investigated recurring reporting issues with operational stakeholders.

EDUCATION

MSc International Business with Data Analytics | Ulster University, Birmingham | Jan 2023 - Jan 2024

Distinction awarded March 2024.

BSc Physics | Federal University of Technology, Akure, Nigeria | Jun 2006 - Oct 2011

PROFESSIONAL DEVELOPMENT

- ISTQB Certified Tester Foundation Level (CTFL) - exam preparation in progress, 2026.
- Software Testing Training & Portfolio Development - independent structured learning in manual software testing, Playwright with JavaScript, browser developer tools and API testing, Jan 2026 - Present.
